## Table Clock Instructions

On the back of the clock there is a small opening. Use the eraser end of a pencil to gently push the clock face out through the front. Be sure to have the other hand ready in the front of the clock to catch the face.

Pop the back off the battery compartment, if your style has one. Insert the required battery. Place the cover over the battery.

Once the battery has been successfully installed, find the small sunburst dial right above the battery compartment. Turn the dial clockwise to set the time.

Enjoy your new time piece for many years.
