

Thank you for Purchasing our Wall Shelf.

We have taken great care to manufacture this shelf just for you.
Please review the screw cap instructions below. We hope you enjoy your new wall shelf.

Step 1:

When mounting the shelf to the wall, please use the provided drywall screws or any other appropriate screw and wall anchors for your application. First place screw through the hole of each screw cap.

Step 2:

Insert the screw into the hole of the shelf mounting bracket. Screw into the wall to secure the shelf. Repeat this step for all mount holes.

Step 3:

After you have secured the shelf using the 4 mounting holes, bend the cap forward to snap into the baseplate of the screw cap. This provides a finished look.
