# How to Mount Your Teester
To The Wall

1. Center the mounting bracket where you want it to hang on the wall.
2. Level the bracket.
3. Carefully mark the level screw locations with a pencil.
4. Secure a screw into each of the marked locations.
5. After hanging your panel(s), *see directions on the bottom page,* take the entire teester and slide the mounting tabs into the slots on the mounting bracket.
6. The maximum recommended load weight is 12 lbs.

How to Hang Your Panel(s)
In Your Wall Teester

1. Take the removable bar and insert it into the
   rod pocket of your panel(s).
2. Push first panel all the way over the side and repeat
   with the second panel.
3. Place the curtains behind the teester.
4. Insert the removable bar back into the teester. Make
   sure the rod sits atop the support after
   the fabric is installed and the rod is secured
   into side support brackets.
5. After hanging your teester onto the wall,
   see directions on the first page, fluff and
   adjust your panel(s) as needed.
6. The maximum recommended load weight is 12 lbs.
