

Thank you for purchasing a Jason W Studios wall sculpture. If you are having problems hanging the sculpture, we have suggestions that we hope make it easier for you to hang.

To line up the holes for mounting the Jason W Studios Wall sculpture to your wall, please try the following procedure.

1. Use a strip of masking tape to cover the holes you want to use to hang the sculpture. Make sure the top edge of the tape is lined up at the top of each hole as you stretch across the sculpture. Make sure you apply sticky side down so it adheres to the mount holes.

2. Mark a place on the tape where the screw or nail is going to be applied to the wall.

3. Take the tape off the sculpture and stick it to the wall where you want the sculpture to hang. Please use a bubble level on the tape to make sure it is level.

Using the tape method is an easy way to mark your holes accurately and eliminates the need to hold the weight of the sculpture when deciding where your holes are going to be made.
